EPWORTH SLEEPINESS SCALE

How likely are you to doze off or fall asleep in the following situations? (In contrast to just feeling tired.) Use the following scale to rate your chance of dozing in the following situations:

Situation <i>Refers to your usual way of life in recent times. Even if you have not done some of these things recently, try to work out how they would have affected you.</i>	Chance of Dozing <i>0= would never doze 1= slight chance of dozing 2= moderate chance of dozing 3= high chance of dozing</i>
Sitting and reading	
Watching TV	
Sitting, inactive, in a public place	
As a passenger in a car for an hour	
Lying down in the afternoon	
Sitting and talking to someone	
Sitting quietly after a lunch without alcohol	
In a car, while stopped for a few minutes in traffic	
Total	

Score analysis

Score of 1-6: you're getting enough sleep

Score of 4-8: you tend to be sleepy during the day; this is the average score

Score of 9-15: you are very sleepy and should seek medical advice

Score of 16 or greater: you are dangerously sleepy and should seek medical advice
